Figgton

Period being modelled 1950's / 60's

Description of the layout -

This is a small country terminus, with all the expected facilities of goods yard, engine shed and a dairy, set somewhere in Southern/Western territory during the late 50s/early 60s. The trains come from Farish and Dapol with a few kit built items sourced from the usual suppliers including the N Gauge Society. Hands free shunting is available using the DG coupling system. Track is Peco code 55 and control is conventional DC. Buildings are a mixture, but there are quite a few Metcalfe card kits on display.

There is a proposal to take Figgton forward by adding a third baseboard in the future.

Build status: Complete, but an additional baseboard is proposed for the future

Size: 255cm x 40cm. Additional operator space will be required (80cm). Overall, 255 x 120. Plus one table for stock boxes etc.

Number of operators: 2. Operated from the rear.

Availability for external exhibitions: Figgton appeared at the 2023 HGDMRS exhibition and is available.

Power sockets required: 2 mains sockets plus 3 for lighting, 5 in total
