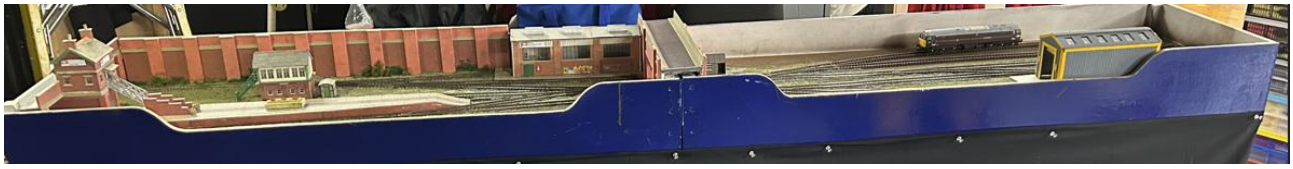
HAZEL GROVE & DISTRICT MODEL RAILWAY SOCIETY

SCAN ME

Hazel Road



Scale: OO

Area being modelled: A fictitious area somewhere around the Stockport/Hazel grove area.

Period being modelled: from the 60s to the present day

Description of the layout

Hazel Road is a small station area with a small station, a signal box and a small Traction Maintenance Depot. This area is accessed under a road bridge via a 3 way point, on the other side of the bridge is a small wagon repair work.

The layout is known as the junior layout and was built on inherited baseboards it was built by members of all ages and has been very successful.

Future developments have been the building of 2 new baseboards to add either end of the existing layout to incorporate another small station a fiddle yard areas to give better running possibilities.

Build status: Exist boards improving scenic work, future boards are a work in progress.

Control system: - Analogue (DC) using a Gaugemaster Combi controller.

Size:- original boards 8’ by 1’4” , new extension16’ by 1’4”. No of operators: 2 is ideal.

The layout can be table top mounted or free standing on its own set of legs.

Availability for external exhibitions: existing boards now onwards, extension in planning
